At Metropolitan Graphics, we create and print wide format signage, graphics and posters using state-of-the-art techniques for crisp, clear ultra high-resolution quality output.

Hi-tech digital imaging is available for single unit and low-run production, while screen and litho printing may be used for higher volume projects.

Our laser photo-printers produce museum quality C-Prints with depth and brilliance, printing up to 68 billion colors.

Signage and graphics may be printed onto a wide variety of substrates and die-cut for any installation, while finishes such as matte, satin or gloss laminates may be applied for gloss and protection.

Please contact us for available sizes, production methods and specifications for your next signage project.
